

SOLAR SUBCOMMITTEE MEETING MINUTES
(Subcommittee of the Lebanon Energy Advisory Committee)

Special Meeting – Solar Monitor Training

4:00PM MONDAY, JANUARY 13, 2020
DPW CONFERENCE ROOM

LEAC Members Present: Clifton Below (Chair), Peter Beardsley, Jon Chaffee, Greg Ames, Peter Beardsley (alt.)

Staff Present: Tad Montgomery – Energy and Facilities, Marc Morgan – Solid Waste, Jay Cairelli and Jim Donison – DPW, Dan Knox – Wastewater

Guests Present: Steve Dzubak and Kim Quirk – ReVision Energy

INFORMAL DISCUSSION AND TRAINING

ReVision Energy gave a presentation in the remote, online monitoring of the City's new solar arrays through the online system provided by the SolarEdge inverter company. Steve described two view options: kiosk, which the public can see, and extensive/complete mode. Aside from Tad, others who asked for access to the extended monitor mode were Greg and Peter.

The following sites have cell modem data receivers: DPW Garage, Landfill Recycling, Wastewater roof, all at 15-minute intervals.

The WWTP ground-mount uses string inverters manufactured by Locus, so this array's production is not visible at this time. ReVision will work to get access for City staff and LEAC members.

ReVision will get the City pretty photos of all arrays using a drone in spring.

ADJOURNMENT

The informal meeting adjourned at approximately 4:10 PM.

Respectfully Submitted by Tad Montgomery
