Mr. Brooks introduced Airport Manager Carl Gross, who began his duties in January. Mr. Gross described the location and details of the project for the Board. The proposal is for a winter equipment storage building on the airport property, and the following items were confirmed for the Board:

- No aircraft will be stored in the building.
- The sweeper does not fit in the current building, and an additional sweeper is expected to be purchased under a grant. Both will need storage.
- The new, wider building will go up within the existing apron of the property with enough room to turn the equipment.
- The current building will be used for sand storage and smaller equipment.
- The building construction cost is funded by two grants and is in the CIP plan for this year with construction planned to begin in the middle of April.
