December 23, 2019

Dear Residents/Property Owner:

I am writing this letter today to share information on the pending street reconstruction that is to take place in your neighborhood in conjunction with the replacement of utility lines for Combined Sewer Overflow (CSO) Project, Phase 13. The streets to be affected in CSO 13 include: A portion of South Main Street (12A) and Romano Circle and some cross-country areas in Romano Place. Attached is a map showing the estimated project limits.

As part of our continuing commitment to openly communicate with our residents, we will be hosting a community conversation at **31 Romano Place** in the **Community Room** on **Thursday, January 9<sup>th</sup> at 5:30 PM.**

As an interesting side-note, our community conversations that normally take place during this phase of a construction project would entail a neighborhood "walk-about" where members of City staff and our engineering consultants would physically walk affected neighborhoods with residents. Due to the current weather conditions, these meetings will be "virtual walk-about." We are fortunate that current technology permits us to virtually walk each street and stop at each residence/property along the way to discuss concerns and answer questions relating to potential project impacts (road widths, sidewalks, trees, driveways, drainage issues, etc.)

Enclosed you will find a brochure titled, "Road Construction on My Street." The brochure was designed to answer some frequently asked questions relative to street reconstruction during CSO projects. I hope you find it useful, and will place it in a spot that is convenient for your future use. We hope that you and all of your neighbors will join us in our virtual walk of the CSO 13 project area. We are looking forward to hearing your concerns, questions, ideas, and suggestions for making this a project that will best serve the needs of all concerned.

If you have any questions or would like to more information in advance of the above mentioned meetings, please contact Christina Hall, City Engineer with public works at 603-448-3112.
