

## LIGHTING AND LIGHTING CONTROLS FOR SMALL BUSINESSES

WHAT YOUR SMALL BUSINESS SHOULD KNOW TO IMPROVE COMFORT AND SAVE MONEY.

Shed some light on energy savings for your business. It seems that efficient lighting and controls are improving at, well...the speed of light. Businesses that completed upgrades even just a few years ago are a few steps behind in the energy savings, light quality and flexibility provided by LED lighting and controls, leaving significant energy savings on the table. This workshop will cover the basics of commercial lighting, an overview of current technology options, and some examples of projects and their associated costs and savings.

**FREE registration required at [NHSavesEvents.eventbrite.com](https://www.eventbrite.com)**

Join your fellow small business owners, municipal representatives, and building trade professionals.
